

## EMR Quick Reference Guide

### Documentation – Non Invasive Ventilation. CPAP, BiPAP & High Flow Nasal Prongs (HFNP) Observations

1. Document Non-invasive Ventilation
  - Select [Interactive View and Fluid Balance](#) > [Adult Systems Assessment](#) > [Non-invasive Ventilation](#)

2. If Non-invasive Ventilation is not visible under the [Adult System Assessment](#), go to the **Customize View icon** and select appropriate fields.

3. To Initiate, Wean, Discontinue and alter the settings go to the [Ventilation Activity](#) and select the appropriate options.

**Important Note:** Update Ventilation Activity every time Non-invasive Ventilation is ordered.

4. Select the appropriate mode:

- [BiPAP](#)
- [CPAP](#)

5. For [BiPAP](#) enter the following fields:

- FiO2
- Pressure Support/PEEP
- Oxygen flow rate
- Rise Time
- Rise level

Complete the required fields and select the  to save the entered information.

6. For [CPAP](#) - enter the following fields:

- FiO2
- Pressure Support/PEEP
- Oxygen flow rate
- Rise Time  
Note: Right click on Rise Time to Add Comment to document RAMP.
- Rise level

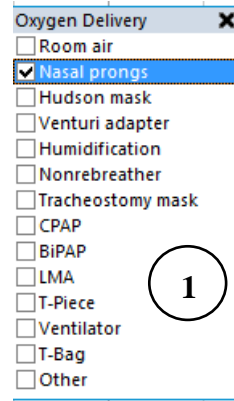

Complete the required fields and select the  to save the entered information.

7. For **HFNP** to be documented correctly, the following two fields

must be entered:

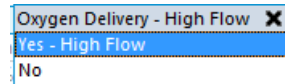

1. Oxygen Delivery – Select Nasal Prongs
2. Oxygen Delivery High Flow

Oxygen Delivery ✕

- Room air
- Nasal prongs
- Hudson mask
- Venturi adapter
- Humidification
- Nonrebreather
- Tracheostomy mask
- CPAP
- BiPAP
- LMA
- T-Piece
- Ventilator
- T-Bag
- Other

2

Oxygen Delivery - High Flow ✕

- Yes - High Flow
- No

Complete the required fields and select the  to save the entered information.
