Documentation - Postural Blood Pressure and Pulses

Note: The fields to record postural blood pressures are not visible by default. Therefore to make the required fields visible:

1. Choose: **Interactive View and Fluid Balance Chart** → **Adult Quick View** → **Vital Signs**.
2. From the **Customize** menu choose the appropriate options from those ticked in the picture, below. Note you will need to choose a combination of at least two options as appropriate for the clinical situation, eg: Supine and Standing.

| Display Name | On View | Default Open |

3. Click: **OK**

4. The required fields are now visible in Interactive View. Fill in the required fields and to save the results. Note: the screen shot shows all six of the postural options made visible.

The screenshot displays a medical software interface titled "Interactive View and Fluid Balance". On the left is a dark sidebar menu with various options, including "Interactive View and Fluid Balan..." which is highlighted with a red box. A red arrow points from this menu item to the "VITAL SIGNS" section in the main content area. This section contains a list of vital signs and postural options, with six red arrows pointing to the following items:

- SBP/DBP Cuff
- Mean Arterial Pressure, Cuff Calc
- SBP/DBP Supine
- Pulse Supine
- SBP/DBP Sitting
- Pulse Sitting
- SBP/DBP Standing
- Pulse Standing

Below this list is a table with the following data:
