

## EMR Quick Reference Guide

### Documentation - Vascath device

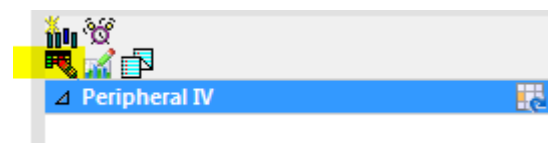

1. Go to '**Interactive View and Fluid Balance**' in the **Table of Contents (TOC)**

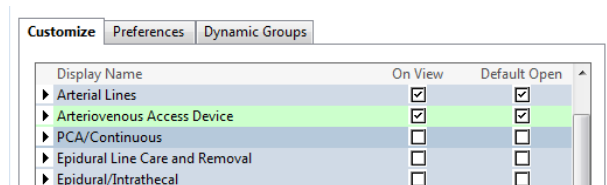

2. Select '**Adult Lines - Devices**' in the submenu

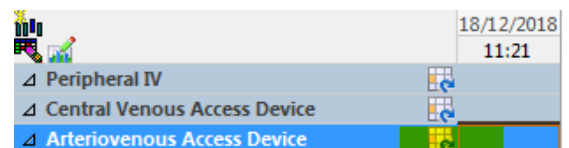

3. Click on the Customise View icon & select the '**Collapse All**' option at the bottom of folder.

4. Tick boxes on the right side of '**Arteriovenous Access Device**' for 'On View' and 'Default Open' to allow options to be readily available and click on '**OK**'.

5. Click on the 'dynamic group' icon to enter the details of the **Arteriovenous Access Type**:

6. Select '**Vascath/Non-tunnelled catheter**', arteriovenous access site, access laterality and click on **OK**.
