

EMR Quick Reference Guide

Midwife – Midwife Initiated Medications

1. Confirm Allergies and Alerts have been recorded, reviewed and updated as required

Allergies: Allergies Not Recorded
Alerts: Not Recorded

2. Review **MAR** to confirm **NO CURRENT** order for medication

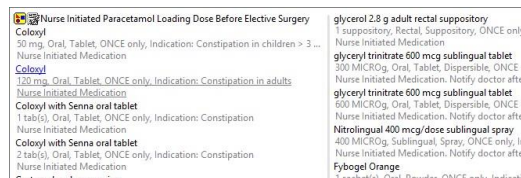

3. Navigate to **Orders** and **Add+**

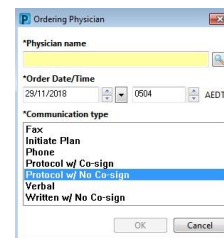

4. Select **Nurse/Midwife INITIATED Medications**

5. Select required medication/s and complete any mandatory fields

6. In Physician signature box, **enter physician listed in Banner Bar (Team Lead for the Colour My Care Team listed)** and select **“protocol no co-sign”**

7. Review **MAR**. Open the **Medication Administration Wizard (MAW)** to administer any medications indicated.

!! Continue to use BOS and other paper documentation e.g. partogram, progress notes, CTG and stickers !!
