

EMR Quick Reference Guide

Pathology Specimen Collection - Women's Outpatient Clinic

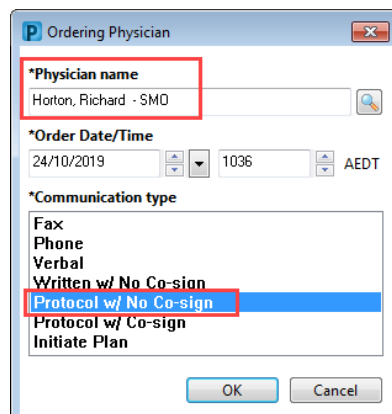

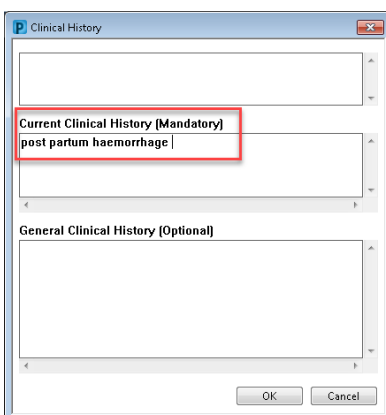

Ordering a pathology test

1. Login into **EMR** and open the patients chart via the **MRN** search located top right
2. Navigate to orders in the patients EMR Power chart.
3. Select the **+Add** and enter in the pathology orders/ investigations in the search engine or select from the options available. You can order multiple orders as required.

4. Complete the clinical history field and click OK.
5. The ordering physician window will appear.

5.
 - a. Ordering within midwifery scope, enter the CMIO Dr. Richard Horton and select 'protocol w/No Co-sign.'
 - b. Ordering outside of midwifery scope, enter the name of the ordering MO, and select 'Verbal / Phone' as appropriate.

6. Proceed to complete the details of the pathology order. All yellow fields are mandatory. Select the collection priority as 'Collect Now.'
7. Click on sign and enter in your password to complete the order request.
