

EMR Quick Reference Guide

Complex Medication Orders - Continuous Subcutaneous Insulin Infusion (CSII) Pumps

Insulin Pumps are documented on the MAR as an ongoing unscheduled order.

Nurses SHOULD NOT electronically administer the order as this will cause the order to drop off.

1. Click on **Orders + Add** and then click **+ Add**
2. Type **insulin pump** into the **Search** field and select either the *Humalog insulin pump* or *Novorapid insulin pump* order.
***Note** – always select the line with a grey order sentence
3. Click on the **Order Comments** tab of the order **Details**.
4. In **Order Comments**, document the insulin: carbohydrate ratio, insulin sensitivity factor and basal rate (in units/hour).

Example:

5. Check the MAR. Hover over the order to see order comments.
