

EMR Quick Reference Guide

Medications - How to view the dose calculator details for weight based orders

Useful for:

- Nursing staff during administration for dose checks
- Pharmacists/medical staff during review of an order

There are two ways the dosing calculator details can be viewed

1. **Medication Administration Wizard:** for orders to be administered
2. **Medication Administration Record:** for orders already administered

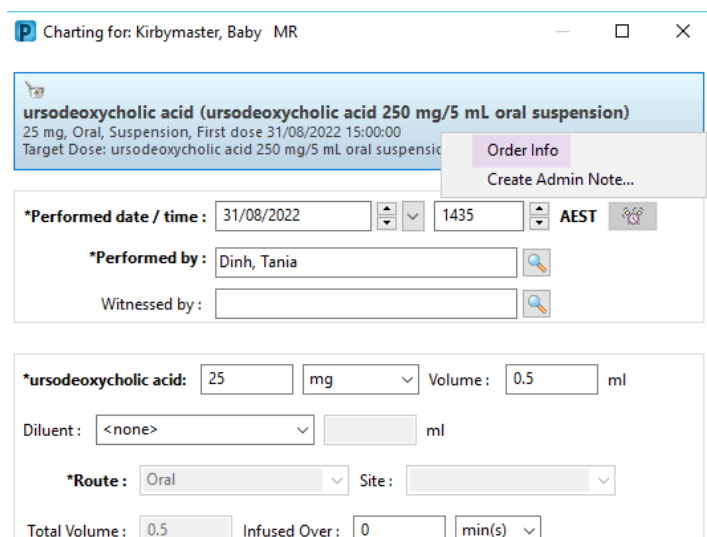

Medication Administration Wizard (MAW)

1. Click on the  icon and scan the patient's wristband
2. Select the medication for administration and click on the "Result" section to open the charting window

<input type="checkbox"/>		31/08/2022 08:00	vitamin A-vitamin E	1 mL, Oral, Solution, Indication: Neonatal...
<input type="checkbox"/>		31/08/2022 03:00	furosemide (frusemide)	2.4 mg, IV Infusion, Vial, First dose 31/08...
<input checked="" type="checkbox"/>		31/08/2022 03:00	ursodeoxycholic acid	24 mg, Oral, Suspension, First dose 31... ursodeoxycholic acid 24 mg, Oral

If charting details window does not open, right click on the order to be administered and select 

3. Once charting window opens, right-click on the blue order details box and select "**Order Info**"

Charting for: Kirbymaster, Baby MR

ursodeoxycholic acid (ursodeoxycholic acid 250 mg/5 mL oral suspension)
25 mg, Oral, Suspension, First dose 31/08/2022 15:00:00
Target Dose: ursodeoxycholic acid 250 mg/5 mL oral suspensio
