

## EMR Quick Reference Guide

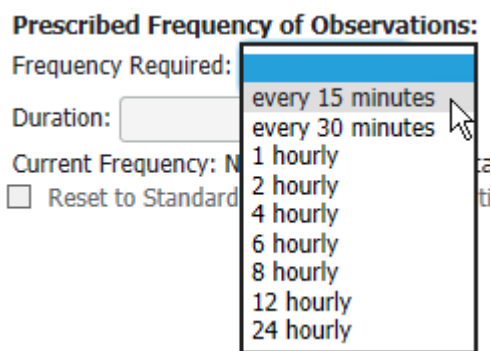

### Observations – Changing Frequency of Observations

#### Changing Frequency of Observations

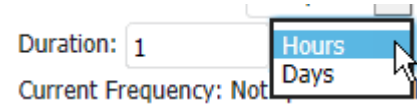

1. Click on the **Frequency** button on the **Observation Chart**

2. Select the **Frequency Required**

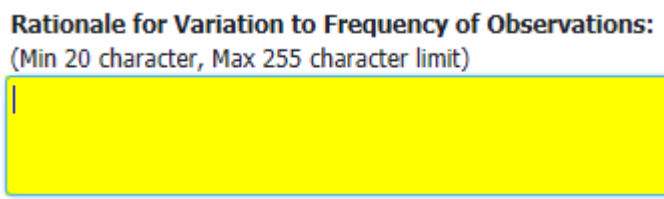

3. Fill in the **duration** at which the frequency of observations are needed

4. Fill out the mandatory **Rationale for Variation to Frequency of Observations** field (Min 20 characters)

Note: An authorizing medical officer is only required if the frequency is changed to greater than 8 hourly

5. Click on the **green tick** icon to confirm

6. The frequency of observations is displayed next to the frequency button on the observation chart
