This Quick Reference Guide will explain how to:

- Set up a dynamic worklist to view patients who are admitted under maternity wards or birthing suites with an unborn alert on their profile.
- How to share the dynamic worklist with other clinicians.

Creating a Dynamic Worklist

1. On the navigational toolbar, select Dynamic Worklist

2. Under List Actions, select Create Worklist

- 3. Enter a name for the worklist
- 4. Under Worklist Details,
 - Select Location
 - Select Auto-Remove Disqualified Patients
- 5. Under Location > Facility, select Sunshine
- 6. Under Location > Building, select SJK
- 7. Under Location > Unit, select all available units

	Create New Worklist						×
	1. Worklist Type 2. Criteria 3	. Su	mmary				
3	*Name Your Worklist: Test Dynamic Worklist		Location		Puilding	Init	Clear

		8	Lookback Range Past Time Unit 14 Days 546 Maximum			9 Next	Cancel

- 8. Under Lookback Range, select 14 Days
- 9. Click Next
- 10. Under Criteria, select category, Risk Assessments

Important

- Make sure that Or is selected, not And
- Make sure that the Name you choose is Unborn Alert, not Unborn Alert Recorded
- 11. Under Risk Assessments > Name, Type Unborn Alert
- 12. Under Risk Assessments > Quantity, At Least 1
- 13. Under Risk Assessments > Value, Any
- 14. Under Risk Assessments > Lookback Range, select 8 months

	μţ	

1. Under List Actions, select Share

- 2. In the **Provider** field, enter the surname of the clinician you want to share the list with to search, then select the appropriate name
- Enter the duration that the list will be shared with this user* 3.

*The list can only be shared for a Maximum of 546 day/ 78 weeks/ 18 months, after this time point the list will need to be shared again

- Add Select 4.
- 5. The clinicians that the list has been shared with will show on the left, the date that the list expires will also be shown
- Repeat steps 1 5 to share the list with other clinicians 6.
