Quick Reference Guide

This Quick Reference Guide will explain how to: add, remove and change an infectious risk alert for COVID-19.

Assessment of the patient's risk should be performed using the latest Western Health Case definition and Risk assessment, De-isolation and Cohorting of inpatients tested for COVID-19 guidelines on https://coronavirus.wh.org.au/

COVID-19 – Adding an Infectious Risk Alert

1. Select **"Dx Problems/Alerts"** from the Table of Contents and select **"Add"** in Problems.

2. Select "**Folders**" and **"Common Alerts"**

---

3. Select the "Infectious Risk" folder

4. Select the appropriate Infectious Alert according to the definitions on WH Coronavirus website:

    - **Infectious Risk - COVID-19 Close Contact**
    - **Infectious Risk - COVID-19 Confirmed**
    - **Infectious Risk - COVID-19 Suspected**

5. Select [OK] and refresh the chart

6. The banner bar will now show "Alerts: Recorded"

COVID-19 – Resolving and Cancelling an Infectious Risk Alert
Once COVID-19 results return, alerts need to be updated or removed in accordance with WH guidelines.

1. Select **"Dx Problems/Alerts"** from the table of contents and select "**Modify**" in Problems

2. Select **'Status'** and change it to
    - **'Cancelled'** for a **Suspected** alert where the patient can be de-isolated
    - **'Resolved'** for a **Confirmed** alert where the patient can now be de-isolated

3. Press "**OK**"
