

Clinical Care – Update Height and Weight

This Quick Reference Guide will explain how to:

Update patient's height and weight in the EMR

1. Click on Adhoc from the Navigation Tool Bar
2. Select Height, Weight & VTE Assessment then chart
3. Fill in any relevant information for your patient in the chart
4. Tick on the **green tick** in the top left corner as shown to sign and save the captured details
5. **Weight** can also be updated in Interactive View under **Adult Quick View** then **Measurements**
 - If the dynamic group is activated, it will automatically calculate Weight Change and Body Mass Index

Measurements			<input checked="" type="checkbox"/>
Weight Measured	kg	60	
Weight Estimated	kg		
Percent Weight Loss/Gain	%	-40	
Ideal Body Weight	kg		
Height/Length Measured	cm	175	
Height/Length Estimated	cm		
Body Mass Index Measured	kg/m ²	19.59	

6. Once updated the weight will display on the banner bar as well as the Inpatient Summary

Weight: 120kg 03/06/2019 15:09

Measurements and Weights (4)			
Selected visit			
	Latest within	Previous within	Change
Height/Length Measured	160 cm 10 days	--	--
Weight Admit	100.00 kg 14 days	--	--
Weight Measured	120 kg 10 days	100 kg 14 days	20 kg
Body Mass Index Measured	46.88 kg/m ² 10 days	--	--
