

ICU - Documentation - ICU Major Events

This Quick Reference Guide will explain how to:

Adding, modifying and viewing ICU Major Events from the mPages

Definitions:

Millennium Page (mPage) – Collates information from various parts of the EMR to create a view that informs workflows

ICU Major Events – collation and summary of clinically important events that have occurred within the ICU to facilitate

Adding ICU Major Events entries from the Nursing mPages

1. Navigate to Nurse View from the Table of Contents Menu to access the Manage or Admission mPages

2. From within the Manage or Admission mPages, select the ICU Major Events component

3. Click on the  symbol and select 'ICU Major Events' from the drop down

4. The ICU Major Events PowerForm displays a free text box under the date and time it was created. Complete the entry and click on the green tick  to save event

Handy Hint – *Performed on date and time field

This date/time can be altered prior to saving the event – entries display in date/time order they were saved
Utilise changing the date to add missed events accordingly

5. Refresh Powerchart

6. ICU Major Events will now display entries left to right, most recently saved first.

ICU Major Events	Admitted ICU from ED via CT Intubated by ED, Art line inserted. nil inotropes

Modifying saved ICU Major Events entries from the Nursing mPages

1. Navigate to Form Browser from the Table of Contents Menu

2. Locate the *ICU Major Events Auth (Verified)* entry from the list of All Forms. As these are saved as individual forms, pay special attention to the date/time the entry was saved.

3. Right click and select Modify

4. ICU Major Events PowerForm window will display with the text from the original entry. Edit the event

(and/or date/time) and click on the green tick  to Save. It will now display as (Modified) within Form Browser.

Or with a small blue triangle from the ICU Major Events component on the mPages
