

Medications - Nurse and Midwife Initiated Orders

This Quick Reference Guide will explain how to:

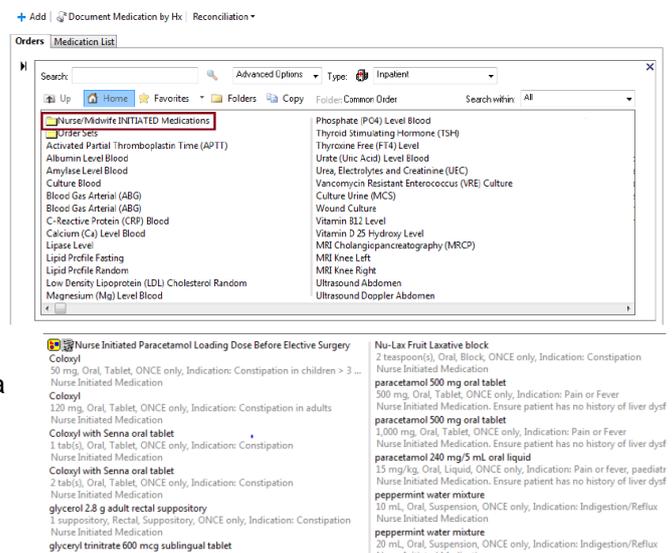

Place an order for Nurse and Midwife initiated medications

Definitions:

MAR – Medication Administration Record

Medications - Nurse and Midwife Initiated Orders

1. Go to **Orders** and click **+Add**
2. The **Orders window** display with the **Nurse/Midwife Initiated Medications** folder first on the left column
3. **Click once** on the folder to open. A list of medications a nurse/midwife can order will display.
4. Select desired medication to be prescribed Eg: Coloxyl 120mg Oral.
An **Ordering Physician Window** will display. **Add name of Consultant** (see Banner Bar) and select **Protocol w/No Co-sign** and click **OK**.

Important – The Clinical System cannot distinguish between Nurse Initiated Orders and all other medication orders.

5. **Review** the order and click **Sign**

Medications
