

# Medications – PBS Prescribing

## Key messages:

There are two types of Authority required PBS prescriptions:

- Streamlined approval items
- PBS Authority items (requires phone authority)

Select the **PBS tab** to see the item's PBS status and view available options (same information found on [www.pbs.gov.au](http://www.pbs.gov.au))

*Dose	*Route of Administration	*Frequency
1 cap(s)	Oral	night

1. Prescribing **Streamlined Approval items** (indicated by an open Padlock in the PBS tab)

a. Click to highlight and select the appropriate indication

PBS Code	Section	Form/Strength	Quantity	Repeats	\$	Streamline Code
2348N	GE	pregabalin 25 mg capsule, 56	56	5	\$20.34	4172

b. This will auto-fill the 4-digit streamline number (aka PBS Restriction ID) in the details page

PBS Restriction ID: 4,172  
PBS Code: 2348N

2. Prescribing **PBS Authority items** (indicated by a closed Padlock in the PBS tab)

a. Click to highlight and select the appropriate indication/restriction

PBS Code	Section	Form/Strength	Quantity	Repeats	\$	Streamline Code
3010K	GE	orfloxacin 400 mg tablet, 14	14	1	\$16.31	5744
3010K	GE	norfloxacin 400 mg tablet, 14	14	1	\$16.31	5806

b. This will highlight the PBS Approval number field yellow in the details page

PBS Script Number: 50,640,118  
\*PBS Approval Number:

c. Quote the **PBS Script number** (greyed out) when calling Medicare for approval

d. Enter in the approval number (e.g. M1234RX) **before** signing the order and printing the script

## Other things to know

- When a PBS code is selected in the PBS tab, the PBS quantity should auto-populate.
- If none of the PBS indications are appropriate, the prescription can be manually changed to “Non PBS”.

PBS Status: Non PBS

- A quantity needs to be manually entered in for Non PBS items. If unsure of pack size, enter “1 box”.
- The script number is unique to each item and will only print if there is a **Streamline Approval code** or **Authority number** associated with the item.
- An Authority Number will always override the Streamline Code
  - E.g. when a phone authority is obtained for a quantity larger than the quantity allowed with the streamlined code. Only the phone authority code will print on the prescription
