# Future Ordersets -Order and Activate

Digital Health Quick Reference Guide

#### This Quick Reference Guide will explain how to:

Order and Activate a Future Orderset

### **Definition:**

**Future Order** – An order that is placed for a future hospital visit in a pending status that requires *activation* **Activate** – A task performed by Midwifery/Nursing staff (on the day the orders are required) to initiate the orders and place them on the MAR for administration

#### Notes

- 1. A future orderset remains on the patient chart for 365 days (without activation)
- 2. Orders should be given as soon as it is activated and/or discontinued as soon as possible to avoid being given at a later/wrong time

## Order a Future Orderset

Future ordersets are identified with 'Future' in the orderset name

1. When a Future orderset is selected, the Select Visit and Start time window opens

- Future Inpatient Visit is pre-selected. Include an estimate of future date where possible (this can be modified later if required)

#### 2. Tick to select the required orders

3. Select

Orders For Signature

4. Check orders on the scratchpad, click

and enter your password

5. Orderset will appear pending in a Future State in the view pane until it is **ACTIVATED**. The order will not appear in the MAR until it is activated

Sign

Handy Hint – Order for <u>This</u> Visit

If the order is required for **this visit**, ensure you are in the *correct encounter*, and the ACTION is changed to **ORDER NOW** (this means the order will be placed when signed and appear on the MAR)

## Activate a Future Orderset

- 1. Open patient chart, select the correct current encounter
- 2. Go to Orders and Referrals
- 3. In the View pane, select the orderset to view details on the right
