

MEDICAL OFFICER KEY MESSAGES

Welcome to Tracking Boards

EMR Phase 2.1 will introduce various types of tracking boards

- From these tracking boards, Medical Officers will be able to see Theatre Lists, ED Patient Lists and many more, all from the EMR
- Two new buttons will be added to the top navigation bar on the EMR

“Tracking Board” will support many unique workflows and is specifically designed for admin staff and clinicians. This will mainly be used by **Emergency, Cancer Services and Maternity** staff

“Perioperative Tracking” will be used as a communication tool to visualise the status and location of patients planned for **theatre**

Here is an example of a Perioperative Tracking Board:
