

# MEDICAL OFFICER KEY MESSAGES

## Camera Capture is coming to Western Health

**Camera Capture** is a mobile application that allows clinicians to quickly capture clinical photos via an iOS or Android device

The photo is then directly saved into the patient's electronic record and securely stored in Multimedia Manager

**A pilot plan for this app will be available to certain specialties following the EMR Phase 2.1 Go-Live**

To find out more about EMR Phase 2.1, please visit the Digital Health information site
