

# NURSING & MIDWIFERY TOP 10

## Welcome to Tracking Boards

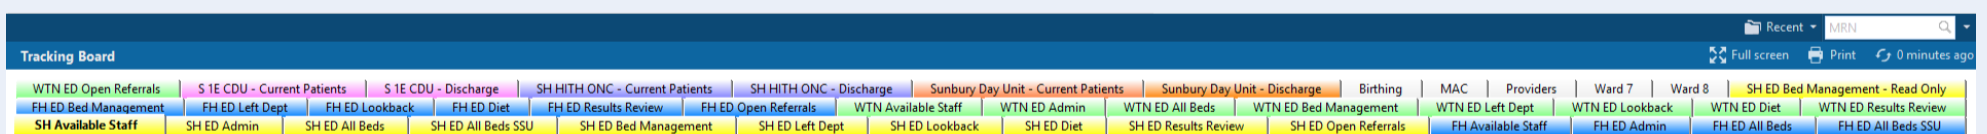

### EMR Phase 2.1 will see the introduction of Tracking Boards

- These Tracking Boards provide real-time updates on bed availability, patient statuses, and the progress of specific care tasks
- They enhance communication, improve workflow efficiency, and support patient safety by providing a comprehensive and real-time overview of key patient-related activities and data
- This helps clinicians and staff effectively manage patient flow and coordinate care

You will be able to access the **Tracking Boards** from the Navigator Bar in the EMR

Here is an example of the **Emergency Tracking Boards**:

To find out more about EMR Phase 2.1 please visit the Digital Health information site - [digitalhealth.wh.org.au](http://digitalhealth.wh.org.au)
