

EMR PHASE 2.1 PHARMACY KEY MESSAGES

Future Order Verification

VERIFICATION ▶ Confirming a medication is clinically safe to supply

PHARMACY PATIENT MONITOR

- Several new filters have been created in the **Pharmacy Patient Monitor**
- These will display all **Future Orders** for verification and do not require a medication request to appear on this list
- The filters display any **Future Orders** up to **42 days** in advance

PHARMNET: PHARMACY MEDICATION MANAGER

- For **Future Orders**, the **Status** column will display as **Future**

Action	Status	Order Sentence	Start	Stop	Order Type
	Active	famotidine 40 mg / 1 tab(s) Tablet Oral ONCE only	10/02/2023 13:45 AEDT	10/02/2023 13:45 AEDT (p)	MED
	Future	famotidine 40 mg / 1 tab(s) Tablet Oral ONCE only	10/02/2023 15:00 AEDT	10/02/2023 15:00 AEDT (p)	MED
Verify	Future	ferric carboxymaltose + Sodium Chloride 0.9% intravenous solution IV Infusion 1,000 mL/hr	10/02/2023 14:41 AEDT	10/02/2023 14:55 AEDT (p)	CONT
	Future	sodium chloride 0.9% 20 - 50 mL Ampoule IV Injection ONCE only	10/02/2023 15:00 AEDT	10/02/2023 15:00 AEDT (p)	MED

FACILITY / LOCATION SELECTION

- When verifying the **Future Order** the **Facility / Location Selection** window will prompt to select a **Facility** and **Location**
- This should be the expected location where the patient will receive their treatment
