

# FirstNet – LaunchPoint Right Click Menu

## This Quick Reference Guide will explain how to:

Educate Emergency Department staff on basic LaunchPoint 'Right Click functions'.

This will also highlight differences between medical/nursing position right click menus

### Treating Clinician Log in (E.g. Doctor):

In LaunchPoint, right click anywhere in the patient row.

4	310:58	01/01/92 31y M	BRATZ, JERRY MR
5	527:36	05/12/01 21y M	CAKE, MADEIRA SIR
5	483:53	01/01/80 43y M	*UNKNOWN, MALE IB...
5	96:13	04/05/00 23y F	HOOD05, REDD MRS
5			HOOD06, REDD MISS

Discharge Process	

This drop down list will appear.

The 1<sup>st</sup> section links to commonly used areas of the patient chart.

The 3<sup>rd</sup> section contains disposition orders and commencement of the RAZ workflow.

The 4<sup>th</sup> section contains the high level data and event record.

Set Privacy changes the patient name to asterisks.

Discharge Process takes you to the task list to discharge the patient.

**Nursing position log in (E.g. Nurse, ACE etc.):**

In LaunchPoint, right click on patient name or in blank space next to patient name.
