Quick Reference Guide

This Quick Reference Guide will explain how to:

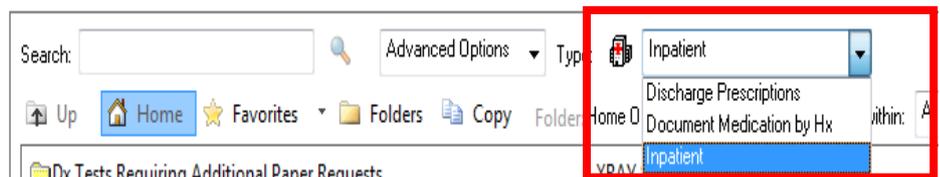

Create a Day Procedure Discharge prescription.

1. Review all Home Medications before prescribing a discharge prescription to check for potential medication interactions and that no other changes need to be made.

- This can be done via the Orders tab by selecting the  button and/or through the patient's record.
- If significant changes are required to the patient's existing home medications, use the Discharge Reconciliation process to ensure an up-to-date patient Home Medication List is maintained. (See QRG "Medications – Discharge Prescriptions")

2. To start a Discharge Prescription select  in the **Orders** Tab.

3. Change the Type from "Inpatient" to "Discharge Prescriptions".

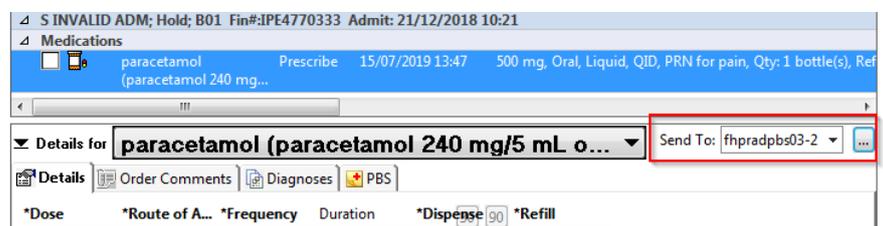

4. Type in the medication(s) required in the Search function box that you wish to prescribe.

5. Select the most appropriate medication order sentence.

6. Adjust order if required and ensure you select the appropriate PBS indication. Note: Please refer to QRG "Medications – PBS prescribing" for more information if needed.

7. Check the printer is correct. Click  if you need to change

8. Click  and enter password.

9. Collect TWO copies from your nominated printer. Sign BOTH copies and give BOTH to the patient.

10. Ensure any changes or new additions to the patient's medications are documented in the patient record and/or discharge summary
