NURSING & MIDWIFERY TOP 10

Devices - keeping patients and staff safe

Ensuring that EMR devices are properly cleaned and disinfected is crucial to prevent the spread of infections and keep patients safe

KEY POINTS TO KEEP IN MIND

- **Clean frequently:** clean and disinfect EMR devices frequently, especially after each patient use or when visibly soiled
- **Use appropriate cleaning products:** use the hospital approved disinfecting wipes
- **Pay attention to high-touch areas:** focus on cleaning high-tech areas such as the keyboard, mouse, touch screen, and power button
- **Keep device surfaces clear:** do not use sticky tape or adhesive products to attach papers on devices

Occupational Health & Safety
