Quick Reference Guide

This Quick Reference Guide will explain how to:

Order a CTPA or an US Doppler Leg DVT variation through the orders tab

1. Order a CTPA or an US Doppler Leg DVT variation through the orders tab
2. When you click on the order, a 'Powerform' will pop up asking for clinical information
3. Filling out the clinical information will generate a score with clinical decision suggestions

Total Score <input type="text" value="4.5"/>	
Score <2	Low Probability (Pre-test probability = 3.4%) Perform PERC Rule (Note: If Yes to any PERC perform Whole Blood D dimer assay)
Score 2-6	Intermediate Probability (Pre-test probability = 27.8%) Perform Quantitative Whole Blood D dimer assay
Score >6	High Probability (Pre-test probability = 78.4%) CTPA scan is indicated. (Note: Discuss with Radiologist if eGFR <60)

4. The second tab on the left of the Powerform can be clicked to view the Clinical Decision Support Pathway:
5. Ensure you click the tick in the top left-hand side to sign the form.

6. Once signed, the calculated score will pull into the CTPA or DVT US order and will be visible to Radiology.
