

# Perioperative - Viewing Perioperative Nursing, Surgical and Anaesthetic Records

## This Quick Reference Guide will explain how to:

View perioperative nursing, surgical and anaesthetic records in the EMR.

## Nursing and Surgical Records

1. Perioperative nursing and surgical records will be visible in the EMR in the standard sections of the EMR you can view documentation in. For example:

a. In the *Documentation* section of the Table of Contents (TOC), or

FHMOT PACU I Record	Cernertest, Surginet: OR M...
<b>FHMOT Intraop Record</b>	<b>16/02/2023 13:39:00</b>
FHMOT Intraop Record	Cernertest, Surginet: OR M...
<b>Operation Report</b>	<b>16/02/2023 10:30:00</b>
Tib/Fib ORIF Operation Re...	Cernertest, Medical Officer...
<b>FH Anaesthesia Printed R...</b>	<b>16/02/2023 09:44:56</b>
	Cernertest, Medical Officer...

b. The *Documents* section of the workflow mPages relevant to your role.

### Handy Hint

Use the *Perioperative Notes* filter in *Documents* to quickly locate all perioperative notes.

## Anaesthesia Records

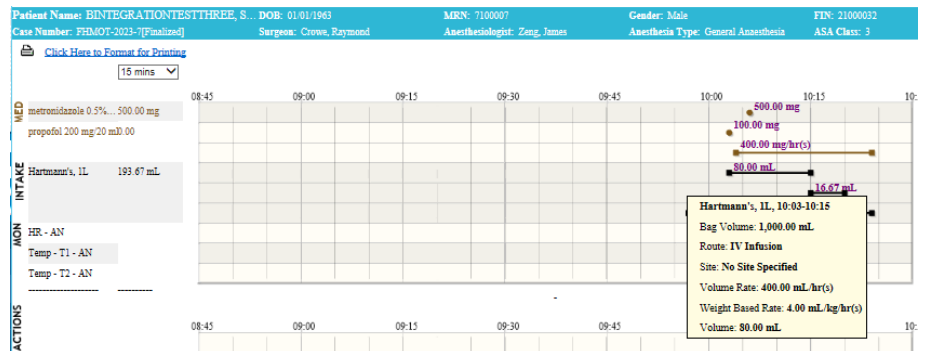

1. Anaesthesia records will be visible in the EMR in the *Anaesthesia Records* section of certain workflow mPages.

This includes the *Medical Officer View Manage* mPage, and the *Nurse View ISBAR Handover* mPage.

2. Click on the procedure name in blue to open the anaesthesia record.

3. Hover over the different parts of the chart for additional information.

4. Anaesthesia records will also be visible in the standard sections of the EMR you can view documentation in, such as via *Documentation* in the TOC or the *Documents* section of the workflow mPages, as outlined in the section on Nursing and Surgical Records.

However, in these sections, the record will often be split over multiple pages. Ensure you click the arrows to view all pages of the anaesthesia record.

The screenshot shows the EMR interface with a list of documents on the left and a detailed view of an 'FH Anaesthesia Record' on the right. A red box highlights navigation arrows in the top toolbar.
