

FirstNet – Treating Clinician Adding Diagnoses to Problem Lists

Digital Health Quick Reference Guide

This Quick Reference Guide will explain how to:

- Adding diagnoses from current presentation
- Adding medical/surgical/family/social histories
- 1. In LaunchPoint click on the patient name and navigate to PowerChart.
- 2. Diagnoses can be added in ED Doctor View (Histories, Problems/Alerts 1 to 3 below) or under Dx Problems/Alerts (4) and Histories (5).
- 3. In Cerner Language:
 - Diagnoses are the clinical issues from the current presentation.
 - **Problems** include care alerts and past medical history, including conditions that are still active and those that have been resolve.
- 4. Add current diagnoses by clicking Problems/Alerts (1):

Type a diagnosis in Add Problem box (3) and select search to the right of the box.

A list of diagnosis will appear, select the most appropriate diagnosis.

It will appear in the box below and you can select This Visit or Chronic or Both in the tic box to the right.

- 5. Details of the diagnosis can be edited or Additional diagnosis can be added by navigating to **Dx Problems /** Alerts (4):
 - Click on Add to add additional diagnosis (6) or double click and existing diagnosis (7).
 - To add an additional diagnosis type a diagnosis in the yellow Diagnosis search box.
 - A list of diagnoses will appear (8). Enlarge the pop up box size if multiple similar diagnoses to select the most appropriate diagnosis.
 - Change details as required for example Principle diagnosis or Additional diagnosis (9).
 - Admend the diagnosis if required (i.e. COPD on domicilliary O2, CCF HFpEF) in the Display as box (10).
- 6. Chronic/resolved problems can be added through the History section on right (5):
 - In the ED Doctor View History (2) section, the Histories search box is not recommended to be used to enter diagnoses, as you cannot select if diagnoses are ongoing or resolved at the time of entry.
 - To add to the History navigate to **Histories** on the left or heading (5).
 - Click Add.
