

# Bacchus Marsh Melton Digital Health Transition

INFORMATION SESSIONS

DECEMBER 2023

Please note the following presentation includes photographs or video from an EMR test environment using test data and scenarios, no real patients are featured.

# Acknowledgement of Country

Western Health acknowledges the Traditional Custodians of the land on which our sites stand. The Wurundjeri Woi-Wurrung, Boon Wurrung and Bunurong peoples of the greater Kulin Nation. We pay respects to Elders past, present and emerging.

We are committed to the healing of country, working towards equity in health outcomes, and the ongoing journey of reconciliation.

Western Health is committed to respectfully listening and learning from Aboriginal and Torres Strait Islander people and wholeheartedly supports their journey to self-determination.

# Agenda

## **Paul Hampson, Digital Health Project Manager**

- Project scope
- Timeline

## **Kylee Ross, Acting Chief Nursing & Midwifery Informatics Officer**

- Current State and Future State reviews
- EMR key features

## **Kirby O'Callaghan, Change & Implementation Analyst BMM**

- Super Users

## **Meilisa Lengkong, Acting Digital Health Learning & Development Manager**

- Training
- Discipline specific scenarios
- Drop-in sessions
  
- **Questions**

## Electronic Medical Record (EMR)

- An EMR is an electronic version of a patient's paper medical record
- EMR information is up to date, easy to read and instantly accessible with multiple healthcare professionals able to access a patient record at the same time from different Western Health sites, allowing greater co-ordination of care
- The Oracle-Cerner EMR was first introduced to Western Health in late 2018 and was significantly enhanced in the EMR Phase 2.1 Go-Live over July – August 2023
- Once the EMR has gone live at BMM, future optimisations, including EMR Phase 2.2, will also Go-Live across BMM

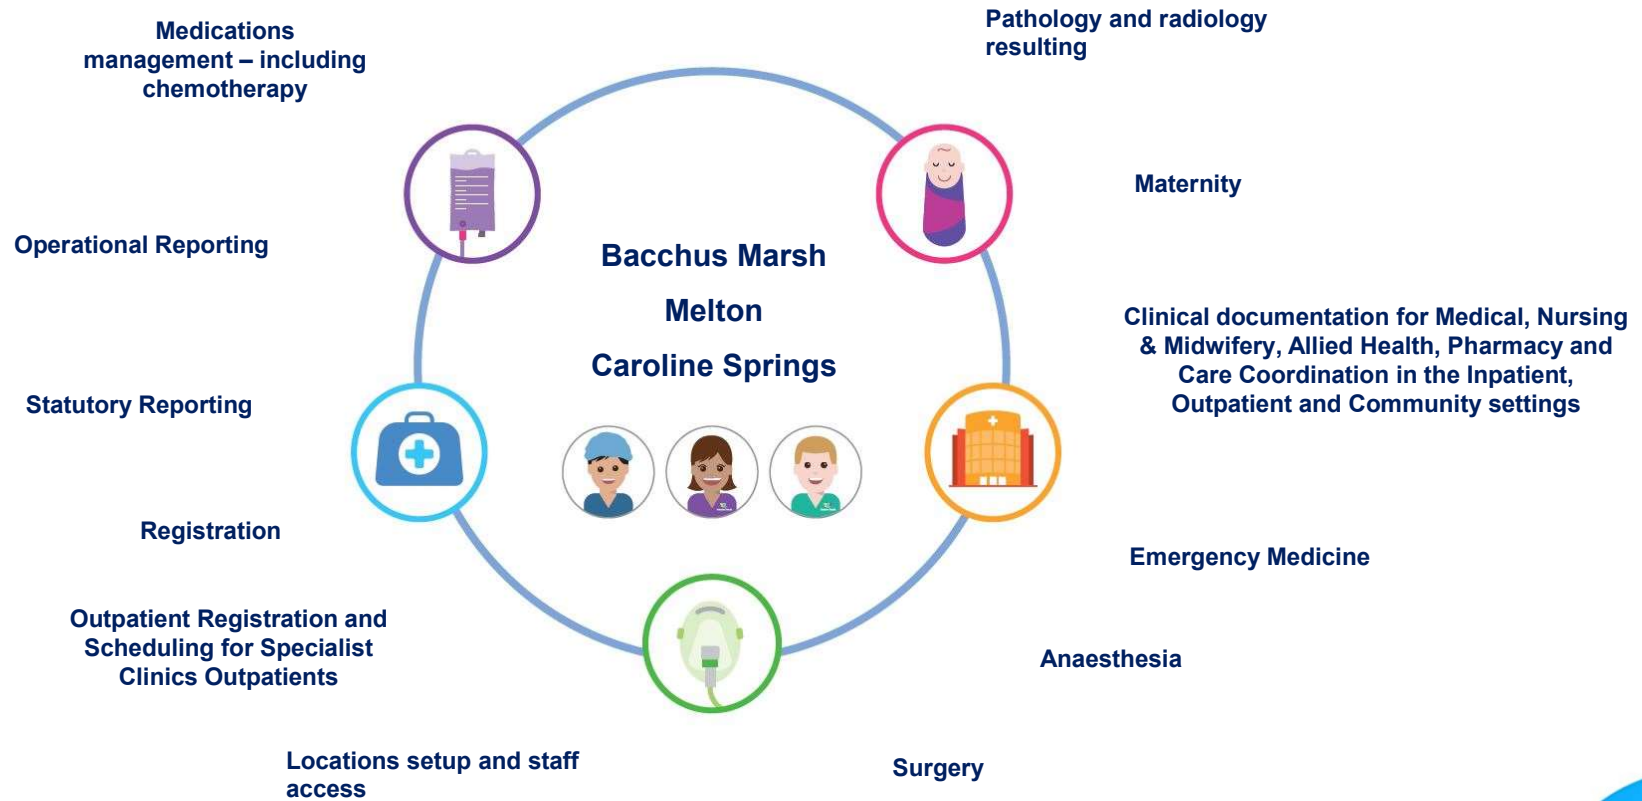

## Bacchus Marsh Melton (BMM) Digital Health transition project

- The BMM Digital Health transition project is extending the functionality which is used to document and manage patient care at Western Health's Footscray, Sunshine, Williamstown and Sunbury sites to the BMM sites
- Work on the Digital Health extension has been underway for quite some time and the transition of numerous applications has already occurred over the first stage of the project
- We are now in an exciting phase where work is underway on the second stage of the project which includes:
  - ✓ Extending the current Western Health Electronic Medical Record, the primary application for managing patient care across Western Health
  - ✓ Replacing BMM CPF with Western Health BOSSnet for scanned medical records
  - ✓ Transitioning BMM iPM to the Western Health iPM as a unified patient administration system

# EMR scope

# BMM Digital Health Transition timeline

# Agenda

## **Paul Hampson, Digital Health Project Manager**

- Project scope
- Timeline

## **Kylee Ross, Acting Chief Nursing & Midwifery Informatics Officer**

- Current State and Future State reviews
- EMR key features

## **Kirby O'Callaghan, Change & Implementation Analyst BMM**

- Super Users

## **Meilisa Lengkong, Acting Digital Health Learning & Development Manager**

- Training
- Discipline specific scenarios
- Drop-in sessions

## **Questions**

## Current State Review

- As part of every Digital Health project, the Digital Health Analysts work with the organisation to understand their clinical and operational workflows, i.e. the current state
- Current State has been reviewed at the BMM sites, and provided the Digital Health team the opportunity to assess if the existing Western Health EMR configuration will work
- Post Current State the Digital Health team identified gaps between BMM and Western Health workflows and is in the process of assessing options to overcome these
- These options could be either, BMM workflow or EMR configuration changes

# Future State

## Why?

- Move towards Western Health having one primary application for managing patient care

## What?

- Extending the current Western Health EMR to Bacchus Marsh and Melton sites

## How?

- Transitioning BMM iPM to the Western Health iPM as a unified patient administration system
- Replacing BMM CPF with Western Health BOSSnet for scanned patient documentation. This includes:
  - Scanned external referrals and correspondence
  - Internal scanned paper documentation
  - External pathology and radiology
- Reduction of paper-based forms

# EMR Key Features and Tips

The screenshot displays the EMR interface for a patient named Testwhs, Patrick. The top navigation bar includes various tools like 'Welcome', 'Multi-Patient Task List', and 'Clinical Leader Organiser'. The patient information bar shows details such as 'Sex: Female', 'DOB: 09/11/1993', and 'Age: 30 Years'. The left sidebar contains a 'Menu' with categories like 'Patient Information', 'Nurse View', and 'Outpatient View'. The main content area is titled 'Nurse View' and shows a 'Media Gallery (0)' and a 'Problems/Alerts' section. The 'Problems/Alerts' section includes an information message and a table of clinical problems.

**Problems/Alerts Table:**

Priority	Problem Name	Code	Onset	Classification	Actions
	Administration of drug or medicament via intrathecal route	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Difficult Cannulation - Notify Anaesthetics Immediately	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Finger injury	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Hepatitis B	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Hypertension	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Infectious Risk - Airborne Precautions	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Infectious Risk - Contact Precautions	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Infectious Risk - Mumps	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Infectious Risk - Whooping Cough	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Pregnancy	--	06 JUN 2023	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	TB - Pulmonary tuberculosis Inactive	--	25 MAY 2020	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>
	Vaginal bleeding	--	--	Clinical History	<input type="checkbox"/> This Visit <input checked="" type="checkbox"/> Chronic <a href="#">Resolve</a>

- Timeline
- Current State and Future State reviews

## **Kylee Ross, Acting Chief Nursing & Midwifery Informatics Officer**

- Current State and Future State reviews
- EMR key features

## **Kirby O'Callaghan, Change & Implementation Analyst BMM**

- Super Users

## **Meilisa Lengkong, Acting Digital Health Learning & Development Manager**

- Training
- Discipline specific scenarios
- Drop-in sessions

## **Questions**

## Super Users

- We're searching for BMM staff interested in becoming Digital Health Super Users to support colleagues in the lead up to, throughout and post the Go-Live
- Super Users have been integral in supporting previous EMR Go-Lives
- There are several reasons to join the Super User team:
  - Improve your skills and knowledge in the EMR and Digital Health systems
  - Build your personal profile and visibility in the organisation
  - Receive certification of the additional training you complete and add this role to your CV
  - Support your colleagues and play a vital role in this exciting project!

## Super Users

- Super Users will receive additional training in the EMR, with the support of the Digital Health team to assist with the following:
  - ✓ **Before Go-Live:** preparing BMM sites for the EMR Go-Live by facilitating in-services and practice sessions and assist with the Go-Live readiness assessments and downtime planning
  - ✓ **During the Go-Live period:** Super Users will provide support as the first point of contact for BMM staff who need assistance, and be the conduits to the Digital Health team in the virtual command centre
  - ✓ **After Go-Live:** Super Users will continue to provide support to their colleagues and communicate any issues with adoption or functionality back to the Digital Health team
- To be an EMR Super User, you must:
  - ✓ Have your manager's approval
  - ✓ Be based at or working at the Bacchus Marsh and Melton sites
  - ✓ Be employed by Western Health at a minimum of 0.6 EFT
- If you're interested in being part of this exciting project, please speak to your manager and then nominate by completing the short Super User form. The link to this form is available on the [BMM Digital Health Transition page](#).

# Training

Our new and improved WeLearn will be ready in the new year!

**Introduction to EMR  
Drop In Sessions  
15th Jan – 9th Feb 2024**

**Mandatory Face-to-Face  
Training  
2024**

**WeLearn Online Training  
2024**

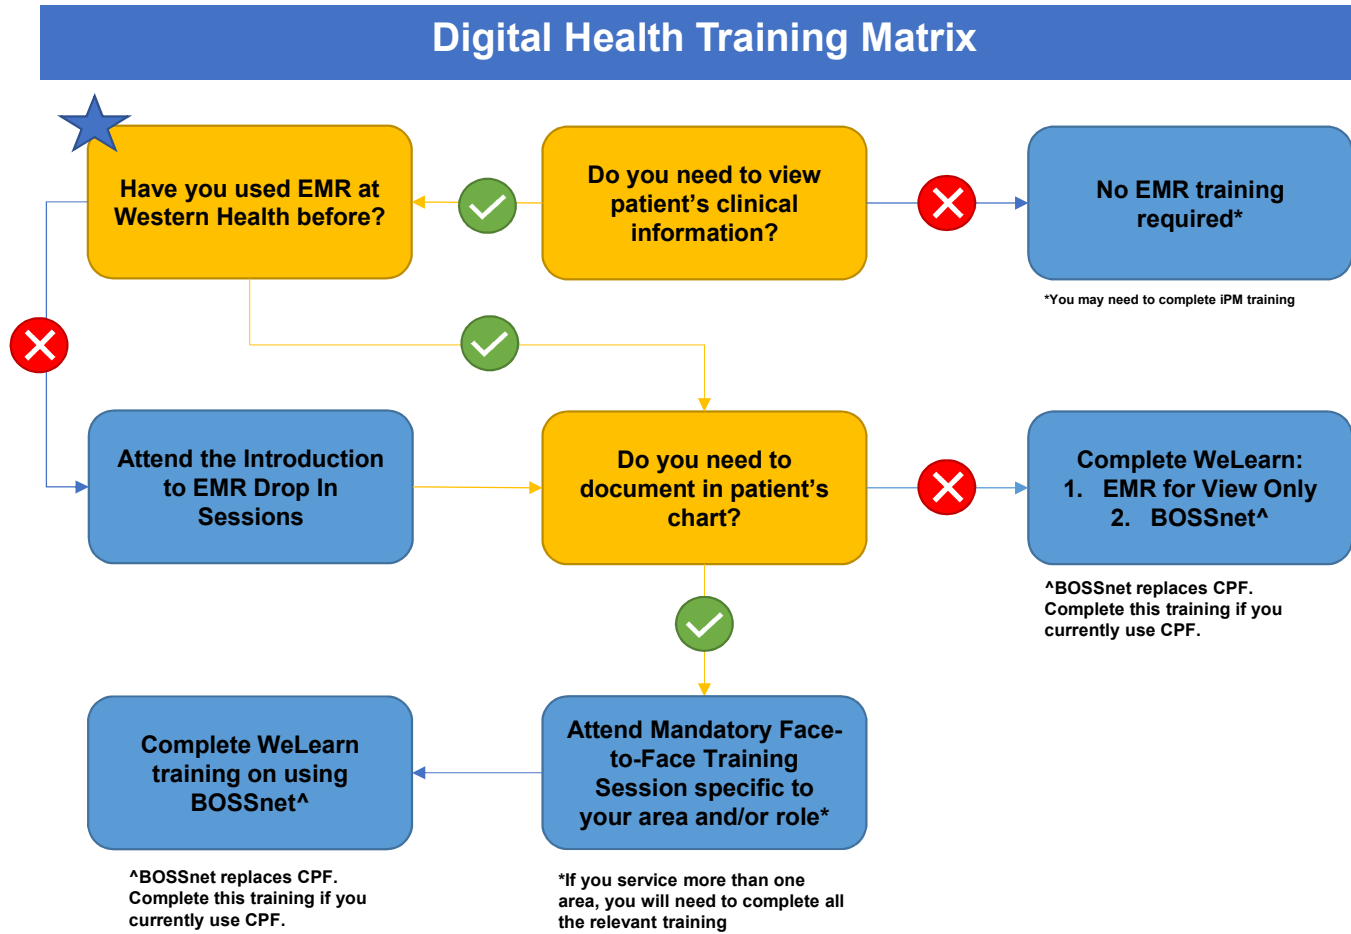

- What: Optional demo sessions for basic EMR functions
  - Who: First time EMR users
  - Where: Bacchus Marsh and Melton
- Register on the day!

- Hands-on training session based on your work area and/or role
  - Where: Bacchus Marsh and Melton sites
- More information to come!

- Can't attend face-to-face training?
  - Want to supplement your face-to-face training?
- Complete relevant WeLearn online courses based on your area and role

# Training scenarios by discipline

## Introduction to the EMR Drop-In Sessions: January/February 2024

Dates	Bacchus Marsh	Melton	Topic
<b>Week 1</b> 15 <sup>th</sup> - 19 <sup>th</sup> January 2024	Conference/Training Room 10:30 – 11:30 am 1:30 – 2:30 pm	Melton: Group Room (Room 38) 09:45 – 10:45am 2:15 – 3:15 pm	<ul style="list-style-type: none"> <li>Accessing the EMR</li> </ul>
<b>Week 2</b> 22 <sup>nd</sup> - 25 <sup>th</sup> January 2024 (No session 26 <sup>th</sup> January 2024)	Conference/Training Room 10:30 – 11:30 am 1:30 – 2:30 pm	Melton: Group Room (Room 38) 09:45 – 10:45am 2:15 – 3:15 pm	<ul style="list-style-type: none"> <li>Searching for a patient in the EMR</li> <li>Creating a patient list in the EMR</li> </ul>
<b>Week 3</b> 29 <sup>th</sup> January – 2 <sup>nd</sup> February 2024	Conference/Training Room 10:00 – 11:30 am 1:30 – 3:00 pm	Melton: Group Room (Room 38) 09:30 – 11:00 am 2:00 – 3:30pm	<ul style="list-style-type: none"> <li>Navigating through a patient's chart in the EMR</li> </ul>
<b>Week 4</b> 5 <sup>th</sup> – 9 <sup>th</sup> February 2024	Conference/Training Room 10:00 – 11:30 am 1:30 – 3:00 pm	Melton: Group Room (Room 38) 09:30 – 11:00 am 2:00 – 3:30pm	<ul style="list-style-type: none"> <li>Viewing clinical information in the EMR</li> </ul>

## Mandatory Face-to-Face Training

**Q. What should I do if I attend the in-person training session and feel I need more help?**

A. Check with your manager and then book to attend another in-person training session

**Q. Where will the in-person training sessions be held?**

A. We are aiming for most of the sessions to be held in training rooms at Bacchus Marsh and Melton. Some sessions may need to be scheduled at the Braybrook Corporate Campus, Footscray or Sunshine Hospitals.

**Q. Will the training sessions be tailored to each area?**

A. The training sessions will be tailored based on your area and/or role. We will make sure to chat with managers to organise suitable training for you.

An EMR Phase 2.1 training session at Western Health's Braybrook Corporate Campus

## WeLearn Online Training

### Q. What sort of training will I receive?

A. Training in EMR and BOSSnet (replacing CPF) will be available via WeLearn to complete at your own pace. This is to supplement your in-person training or if you cannot attend in person training.

### Q. How long will the WeLearn packages take to complete?

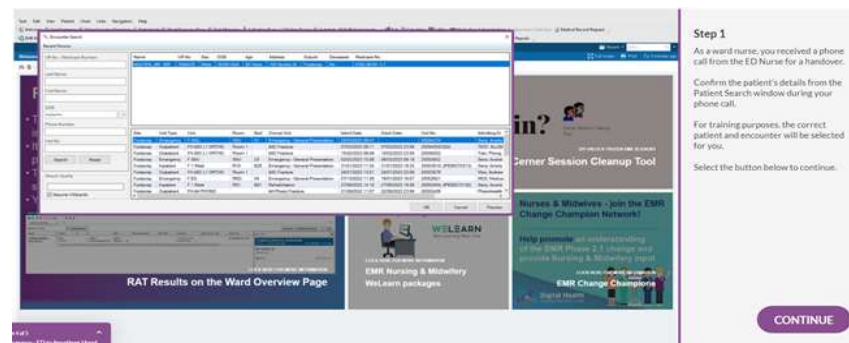

A. Completion of the online modules varies based on the learner's specialty, position and computer skills.

### Q. What if I can't complete the module in the one go?

A. Each module does not need to be completed all at once, it can be saved so a learner can come back to it at another time.

Current Passport to Surgery WeLearn lesson

Current ED to Inpatient Handover WeLearn lesson

## EMR Practice Environment

### Q. Will we be able to practice what we learn in training?

A. Yes. You can access the EMR practice environment via the EMR Super Users or the clinical nurse educators for your area. Each Super User and educators received an EMR practice environment login as they completed their training and have been encouraged to share this with their colleagues.

This practice environment is not linked to the EMR system that is used in everyday work, and the patients in the practice environment are test ones, not real. The system is refreshed every night, so the test patients are re-set for more practice the next day.

The practice environment is a simulated EMR environment and may look slightly different and contain less patient information compared to the real EMR environment.

# Further support leading into the Go-Live

- [Workflow videos](#) available on the Digital Health information site
- [Quick Reference Guides](#) also available on the Digital Health information site, each guide steps through an individual workflow
- On request from clinical areas, the Digital Health trainers will also present virtual (Zoom) or in-person live demonstrations of specific workflows during in-service hours or team meetings

### Workflow and Functionality Videos

The EMR training team and Western Health clinical care and support staff have created the following videos to guide you through some of Western Health's most common workflows in the EMR. For further information regarding these videos please contact the Digital Health team at [digitalhealth@wh.org.au](mailto:digitalhealth@wh.org.au)

**Initiating, Documenting and Reviewing a Comprehensive Care L**

In this video, you will learn how to document a Comprehensive Care IPOC for a patient on admission. ...

**Phototherapy Treatment for Neonatal jaundice**

In this video, you will be shown how to order, modify and discontinue Phototherapy Treatment for Neonatal jaundice. ...

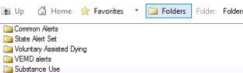

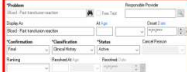

**Maternal Observation Response Chart - Postnatal**

In this video you will learn how to manually change the Maternal Observation Response Chart to the Postnatal Chart on the EMR. ...

### Alerts - Add Alert

Digital Health  
CONNECTING BEST CARE  
Digital Health  
Quick Reference Guide

This Quick Reference Guide will explain how to:  
Add an Alert in EMR

1. Click on **Dx, Problems/Alerts** from the Table of Contents (TOC) 
2. Click on **+** under 'Problems' to add an Alert. 
3. Select Appropriate Folder: **Common Alerts**, **State Alert Set**, **Voluntary Assisted Dying 'VEMD alerts'**, or **Substance Use**.   
**Handy Hint**
  - Selecting 'Common Alerts' folder open up to multiple folders.
4. Select the alert from one of the folders by double clicking on it
5. In this instance Blood-Past Transfusion reaction is selected. This populates on the Problem window. Complete the information and click **OK** to submit to patient chart. 
6. Refresh page and verify the alert has been 'Recorded' in the blue banner bar. **Note:** The actual details of the Alert are not displayed on the Banner Bar due to privacy considerations.
