

Documentation – Results Review

Setting a default results range

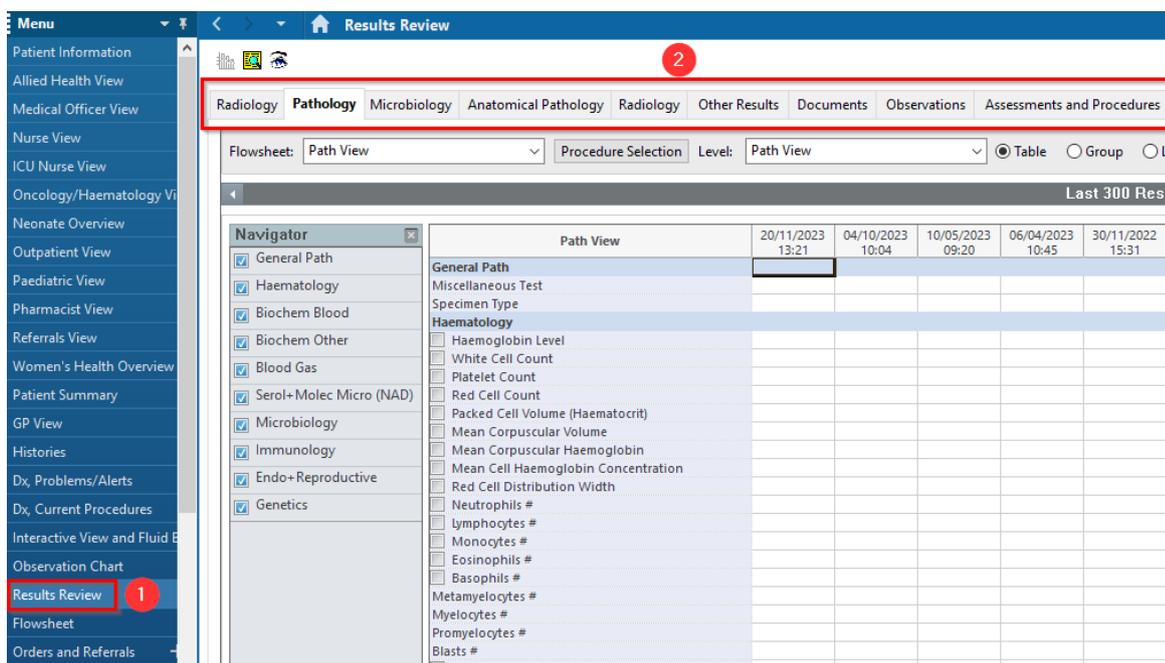

This Quick Reference Guide will explain how to:

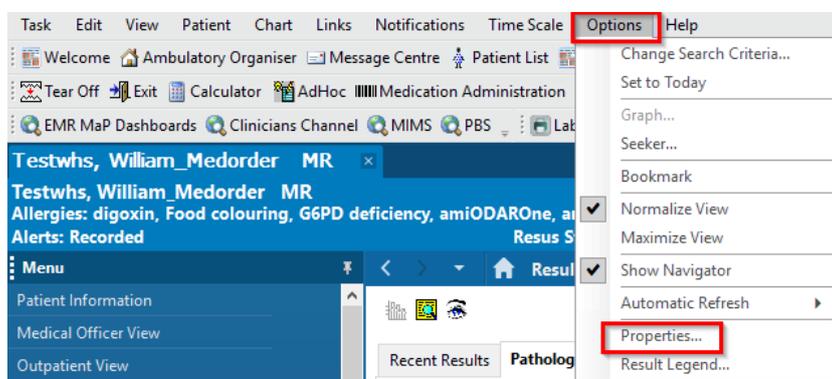

Set a default range of results to display in Results Review

Setting a default results range

1. Navigate to the Results Review tab (1) in the Table of Contents (TOC) and select the relevant tab (2) in which you want to set a default range

2. Select the Options tab in the navigation tool bar at the top of the page
3. From the drop-down menu select 'Properties'

- In the Properties box that displays, select the 'Defaults' tab and click on the 'Clinical Range' radio button
- Choose the desired default range in the 'Default Range Offsets' box
- Click OK
- Close and re-open the patient chart in order to see this change reflected

Flowsheet Properties

Settings Display **Defaults**

These defaults must be saved and the application restarted for them to take effect.

Default Retrieval Type

Clinical range
 Posting range
 Result count
 New results
 Admission date to current date

Filter by selected encounter

Adjustment Increments
7 Days or 300 Results

Default Range Offsets

Forward 2 Units Months
Back 2

Default Result Count
Results 300 Years 3

Number of Hours Previous to the Admit Date: 0

Re-apply defaults for each new chart.

Save OK Cancel

Important – Setting a clinical default range that is too long may result in longer load times

- If the default range is set to include too many results, it may result in excess loading times for the Results Review page
