

Medications – Pharmacist Generated Discharge Prescription (Medical Officer)

This Quick Reference Guide will explain how to:

Complete Discharge Reconciliation and generate a discharge prescription that has been pre-planned by a Pharmacist

Review the Pharmacist Discharge Script Planning note

- The 'Pharmacist Discharge Script Planning' note must be reviewed by the Medical Officer prior to completing Discharge Reconciliation.
- This contains information on which medications require specialised approval e.g. phone authority or permit, any medication changes and information for Medical Officer to review.

Discharge Reconciliation

- Navigate to Medical Officer View and select the Discharge tab
- Select Medication Reconciliation component and click Discharge
- The reconciliation window will appear. A selection for each medication will be **prefilled** by the pharmacist. These medications are in a 'planned' status as denoted by the symbol.

Order Name/Details	Status	Continue	Create	Do Not Continue	Order Name/Details
Continued Home Medications					
aspirin (aspirin 100 mg oral tablet) 1 tab(s), Oral, daily (with or after food), 112 tab(s), 0 Refill(s)	Discontinue	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	aspirin (aspirin 100 mg oral tablet) 100 mg given as 1 tab(s), Oral, daily (with or after food), 112 tab(s), 0 Refill(s)

Symbol Legend:

	Continue medication after discharge	This will not be included on the discharge script but it will appear on the discharge summary. Only use when a patient is transferred to a non-Western Health hospital.
	Create new prescription	Adds medication to discharge script and discharge summary. Always use for ongoing medications including home meds regardless of whether or not patient needs supply, as per WH policy.
	Do not continue medication on discharge	The medication will cease and will not be printed on the discharge script or discharge summary.

- Review all medications and modify if required. To modify a medication order details, right click and select Modify on the order
- Inpatient infusion orders cannot be reconciled upon discharge.
 - If intravenous or subcutaneous medications are required on discharge (e.g. for HITH), add them as ampoules or vials

Medications	Status	Continue	Create	Do Not Continue
fenofibrate 145 mg given as 1 tab(s), Oral, daily	Ordered	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
flucloxacillin (additive) + Sodium Chloride 0.9% infusion 100 mL 2 q, 200 mL/hr, IV Infusion, 6 hourly	Ordered	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- Add any additional discharge medications by clicking Add

Review the Pharmacist Discharge Script Planning note

For medications that require PBS phone authority the pharmacist will annotate 'pending approval' in the PBS approval number fields. The Medical Officer must update this with the obtained phone authority number.

Details for **enoxaparin (enoxaparin 40 mg/0.4 mL injectable solution)**

Send To: Microsoft Print to PDF (frd)

Details | Order Comments | Diagnoses | PBS

Dose	*Route of Administrat...	*Frequency	Duration	*Dispense	30 90	*Refill
40 mg	Subcutaneous	daily		30 syringe(s)		0

Indication:

PBS Status:

PBS Code:

PBS Restriction ID:

PBS Script Number: 70,805,013

*PBS Approval Number: pending approval

Brand Substitution Not Permitted: Yes No

Type Of Therapy: Acute

Stop Date/Time: **/**/****

- Complete mandatory fields and select appropriate PBS code if applicable. For non-PBS items where the quantity is unknown, enter "1 box(es)" into the Dispense field.
- Check the printer by right clicking the order and select Modify on one of the planned prescription orders.

A) Printer is correct	Proceed to Step 9A
B) Printer is 'Do Not Send...'	Proceed to Step 9B or proceed to 8C to change printer
C) Printer is not correct	Right click each planned prescription order and select Modify. When all planned prescription orders are in a modifiable state, select one of the order, click or select the drop down option to find the correct printer. The printer will update for all the planned orders. Proceed to Step 9A or 9B depending on the selected printer i.e. actual printer or 'Do Not Send...'

Do Not Continue Inpatient PRN Meds | Do Not Continue Remaining Orders

Send To: Do Not Send: other reason (Rx) ...

Details | Order Comments | Diagnoses | PBS

*Dose	*Route of Administrat...	*Frequency	Duration	*Dispense	30 90	*Refill
225 mg	Oral	daily (with or afte...		28 tab(s)		0

Drug Form:

Special Instructions:

PRN:

Reg 24:

- Click Reconcile **and Sign** to generate a discharge script. The EMR will automatically print TWO copies (Medicare and Pharmacy copy).
 - Click Reconcile **and Sign**. The prescription will then need to be printed in **Orders and Referrals** via **Print Rx**.
- Sign both copies and give to the pharmacist/patient

Troubleshooting – Printing Issues

For all Printing Issues refer to the *Medications – Discharge Prescription (includes printing issues) Quick Reference Guide*
