

## 2024 ELECTRONIC MEDICAL RECORD (EMR) CODE UPGRADE

ACTIVITY / AREA OF EMR	BEFORE CODE UPGRADE	AFTER CODE UPGRADE
<b>Auto Text: Multi Select Dropdown List</b>	Only one option was permitted in the auto-text dropdown list.	<b>A new feature is available</b> allowing for a multi-selection of checkboxes in the drop-down list. You will need to select the <b>'apply'</b> button to confirm.
<b>Diagnostic Triage mPage: Additional Filters</b>		There are <b>two new filters available for selection</b> on the Diagnostic Triage mPage. They are <b>'Test to Be Performed'</b> and <b>'Procedure'</b> .
<b>ED LaunchPoint: Patient Summary</b>	The Activities and Triage Information headings in the universal window do not allow you to enter the patient record.	The Activities and Triage Information headings in the universal window will open to the patient's chart when selected.
<b>Medication Administration Record (MAR): Early Administration Medication Warning</b>  <b>Workflow impact for Nursing and Midwifery</b>	Medication can be documented as not given, through an early administration warning message,	<b>Warning messages for early medication administration will no longer include the option to mark the medication as "not given."</b> <ul style="list-style-type: none"> <li>This change only affects situations where you try to document a medication as "not given" before its scheduled time.</li> <li>Nurses and Midwives will continue the current practice to document not giving medications.</li> <li>If you need to mark an early medication as "not given", you should follow the normal 'not given' workflow via the MAW as per the <a href="#">Quick Reference Guide</a>.</li> </ul>
<b>mPages: Tag Icon</b>	The tag icon only illuminates when text is tagged.	The tag icon will remain illuminated.
<b>Notes: Date of Service</b>	When creating a note through the 'documentation tab' or using the 'sign/submitting a note window', the term <b>Date</b> is used.	When creating a note through the 'documentation tab' or using the 'sign/submitting a note window', the term <b>'Date of Service'</b> will appear.
<b>PowerForms: Scrolling Function</b>	There is no feature for the mouse wheel to scroll in PowerForms.	You can use the mouse wheel to scroll in PowerForms.
<b>PowerChart Provider Selection: Viewing Active Patient Relationships</b>	Active patient relationships view is not available.	<b>A new feature</b> has been added to the provider selection window for active patients. <ul style="list-style-type: none"> <li>It includes a checkbox to show only the patient's current relationships.</li> <li>The checkbox isn't checked by default, but once you select it, the setting will be saved for future use.</li> <li>You will still need to type to search, however the return results will be limited to those providers who have an active relationship with the patient.</li> </ul>
<b>Workflow MPages View: Last Saved Date/Time</b>	No 'last saved' Date and Time displayed.	<b>A new feature</b> displays the last saved Date and Time.

Please refer to a [brief video](#) of the most significant changes outlined above.
