

This Quick Reference Guide will explain how to:

Log in to the Connect Nursing mobile application on the Zebra and SpectraLink devices and accessing patient's data.

Definitions:

Connect Nursing – A mobile Electronic Medical Record (EMR) application that allows nursing staff to review patient clinical information and administer simple medication on the go.

Important – Limited Availability and Functionality

- Connect Nursing is currently being piloted for nursing staff at the Bacchus Marsh Medical Surgical Unit (MSU) Ward only.
- Review Medications on the Medical Administration Record (MAR) from Workstation on Wheels (WOWs) or desktop EMR, not from Connect Nursing application.
- Vital Signs documentation and Infusion administration will need to be completed from the WOW or desktop EMR.

Using the SpectraLink Device

1. From your mobile device, turn the screen on and swipe up to open the home page.
2. Click on Connect Nursing application.

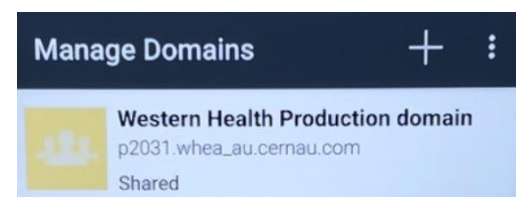

Activate scanner

Volume button

On/Off Sleep/Wake

3. From the Manage Domain window, select **Western Health Production domain**.

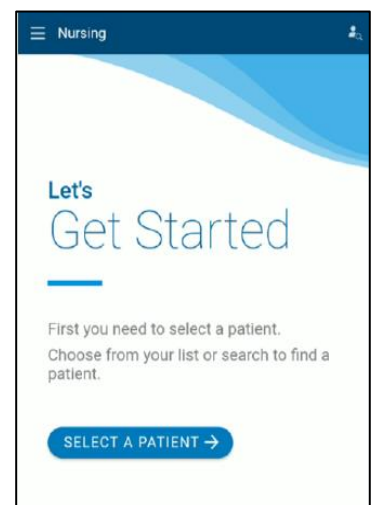

- Log in to the application using your WH Username and password and press **Log In**.

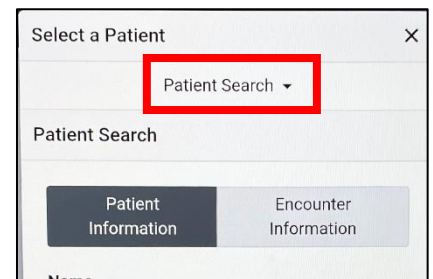

The log in credentials is the same when logging in to desktop EMR.

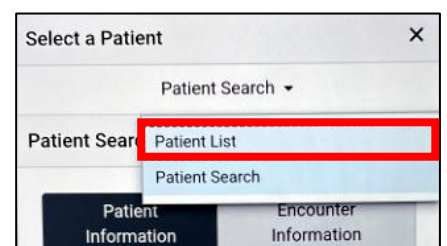

- From the **Let's Get Started** window, click on **Select A Patient** button.

- From the **Select A Patient** window, click on **Patient Search**.

- You can search for a patient or select one from your existing Patient List. Select **Patient List**.

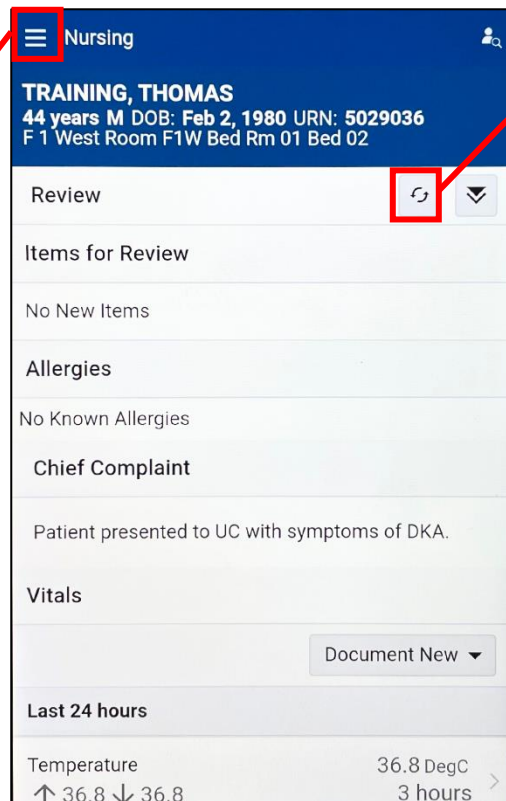

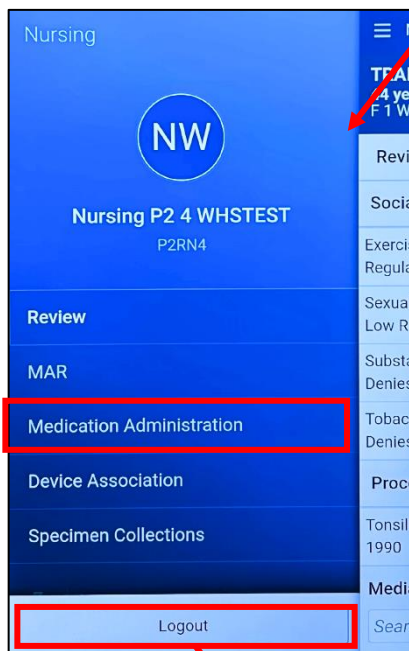

8. Select the patient you wish to review from the list.

9. Your patient's chart opens to the **Review** page.

Click on the  icon to access Medication Administration Wizard (MAW)

Refresh the page periodically

Click **Logout** at the end of your shift

Handy Hint – Watch the [video](#) on how to use Connect Nursing to review clinical information and administer simple medication.
